FIELD ADVISORY SERVICES

ADVICE FROM THE EXPERTS

DSI SANDWICH SHOP

Is your sandwich belt high angle conveyor still operating at its full potential? Are you keeping an eye on the sandwich conveyor specific maintenance items that will head off future downtime? Your high angle conveyor is a carefully designed machine. Scheduling periodic expert reviews will ensure that your high angle conveying system will continue to operate efficiently and productively for many years.

Material spillage, carry-back, premature component wear, and increased power consumption are just a few of the indicators that a high angle conveyor is no longer at its best and is in need of proper servicing. But there is no need to wait for something to go wrong! Use our field advisory services as a preventive measure towards securing productive operation.

WHY CHOOSE DSI?

Dos Santos International is the world's foremost authority on the sandwich belt high angle conveyor technology. J.A. Dos Santos, founder of DSI, developed the sandwich belt technology in the early 1980s. Mr. Dos Santos, the inventor of the most successful sandwich belt systems, engineered, delivered and started up more sandwich belt high angle conveying units than anyone in the history of this technology. Why rely on anyone else?

While the Sandwich belt high angle conveyor is the flagship system of Dos Santos International, we also offer extensive expertise throughout the materials handling field, including design and high tech analysis of conventional conveyors, studies for new systems, upgrade of existing systems and general structural and mechanical consulting services.

OUR EXPERT SERVICE IS A SMALL EXPENSE WHICH WILL QUICKLY PAY FOR ITSELF IN MAINTENANCE SAVINGS AND PRODUCTIVITY INCREASES IN THE LONG TERM.
